

Smartcheck by Liverton

Mini

Minimalist, compact design provides a feature set aimed towards small spaces.

This kiosk will streamline your check-in and out process including room key collection and return.

Works wonders when paired with app and web flows to allow payment to be completed prior to approaching the kiosk.

Payment is still achieved via the Mobile App and Pre-Check In Web portal support.

Key Features

- Check In/Out
- Mobile App Support
- Property Management System Integration
- Key Card Encoding
- Web Pre-Check In Ready
